PROFESSIONAL SUMMARY

Lead Software Engineer with 11+ years building scalable React.js / Next.js frontend platforms, including 10+ years at Algoworks (~7 React production projects). Hands-on in TypeScript, React architecture (hooks, Context API, Redux Toolkit, React Query), Next.js (SSR/SSG), Tailwind CSS, GraphQL/Apollo, JWT/RBAC auth flows, testing (Jest, React Testing Library, Storybook), accessibility basics, and web performance (PageSpeed/Lighthouse up to 90+). Led a 3-5 engineer project workstream; trained 20+ engineers (2022-2024) from HTML/CSS through JavaScript to React, cutting new UI joiner ramp-up from ~1 month to ~2 weeks.

TECHNICAL SKILLS

Frontend: React.js, Next.js (SSR/SSG), TypeScript, JavaScript (ES6+), HTML5, CSS3, SASS/SCSS, Tailwind CSS, Bootstrap
React Ecosystem: Functional Components, Hooks, Context API, Redux Toolkit, React Query, Reusable Component Architecture, Routing, Forms & Validation

APIs & Auth: REST API Integration, GraphQL, Apollo Client, JWT/RBAC Auth Flows

Quality & Performance: Jest, React Testing Library, Storybook, Accessibility (a11y), Lighthouse / PageSpeed Insights

Engineering: Git, Bitbucket, VS Code, Jira, Agile/Scrum, Code Reviews, Chrome DevTools, Figma, CI/CD-aware frontend delivery

AI-assisted delivery: Cursor, Claude, Antigravity

Also used: Angular, RxJS (enterprise admin UIs); Vue.js (select projects)

WORK EXPERIENCE

Algoworks - Noida, India

Lead Software Engineer (Frontend / React)

Senior UI Developer

Feb 2016 - Aug 2026

Jan 2019 - Aug 2026

Feb 2016 - Dec 2018

- Led a 3-5 engineer frontend workstream on project delivery: component architecture, PR standards, estimation, and collaboration with Java, .NET, Salesforce, and mobile teams.
- Trained 20+ engineers (2022-2024) on a structured path (HTML/CSS -> JavaScript -> React); cut new UI joiner ramp-up from ~1 month to ~2 weeks, raised code quality via reviews/standards, and upskilled React/Angular engineers on UI fundamentals to reduce dependency on dedicated UI support.
- Occasionally supported hiring through technical evaluation of frontend candidates.
- Built production React/TypeScript apps and admin panels (~7 React projects) using hooks, Context API, Redux Toolkit, React Query, reusable UI systems, complex forms, routing, GraphQL/Apollo where needed, and secure JWT/RBAC authentication workflows.
- Improved frontend quality with Jest, React Testing Library, and Storybook for shared UI; applied accessibility (a11y) basics on key user flows.
- Used Cursor, Claude, and Antigravity to speed up frontend feature work and unit tests (Jest / React Testing Library), so typical day-long tasks finished faster without dropping quality.
- Delivered Next.js apps with SSR for dynamic content (e.g. posts/user pages) and SSG for static pages (About, Contact) on a food-recipe style web product.
- Improved Google PageSpeed/Lighthouse on a Hippo CMS (Couchbase) homepage from ~10-15 to 90+ using code splitting, lazy loading, unused CSS/JS removal, image optimization, FCP/TBT-focused loading, and async/defer for non-critical CSS; applied the same playbook across 10+ WordPress, Hippo CMS, React, and Next.js experiences.
- Delivered cross-team UI support (2016-2020): responsive builds, enhancements, cross-browser fixes, and frontend expertise across multiple concurrent client programs.

Earlier Experience

UI / Web Developer - Protologic Solution Pvt. Ltd. (Jun 2015 - Feb 2016); Junior UI / Web Developer - CW Logix (Oct 2014 - Jun 2015). Built responsive cross-browser web UIs with HTML5, CSS3, JavaScript, and WordPress.

SELECTED PROJECTS (REACT-FOCUSED)

Energy & Water Monitoring Platform

Led a 5-engineer React (JavaScript) frontend for an enterprise utility-monitoring SPA with Redux, MUI, Azure AD (MSAL) auth, Power BI dashboards, Formik/Yup forms, and charts/tables; shipped multi-environment builds (dev/stage/prod).

Event Booking Marketplace

Led a 6-engineer React (JavaScript) frontend for a service booking marketplace with AWS Amplify auth, Redux Toolkit, FullCalendar scheduling, Stripe payments, Firebase, and Twilio Conversations chat; Formik/Yup forms and i18n; shipped multi-env builds (dev/stage/prod) for discover-book-pay-chat flows.

Enterprise React Admin Platforms (2020-2026)

Delivered 10+ React admin/ops frontends (healthcare, cards, analytics, and internal tools) across client programs - ~half in TypeScript, ~half in JavaScript - using Redux Toolkit or Context API by project needs; built reusable table/form patterns, role-aware UI, and provided production support.

Food Recipe Web App (Next.js)

Implemented SSR for dynamic recipe posts/user details and SSG for static pages (About, Contact); TypeScript-friendly React patterns and API-integrated content flows.

Couchbase / Hippo CMS Performance

Took homepage PageSpeed/Lighthouse from ~10-15 to 90+ via FCP/TBT-focused optimization, unused CSS/JS cleanup, lazy loading, code splitting, and image optimization; extended practices across content and logistics web experiences.

EDUCATION

B.Tech - Information Technology, Dr. Rizvi College of Engineering

2008 - 2012
